

# REPIC

WEEE | BATTERIES | PACKAGING

## REPIC

REPIC is an industry-leading provider of producer responsibility solutions for waste electrical and electronic equipment (WEEE), batteries and packaging. As the operator of the largest household WEEE producer compliance scheme in the UK, REPIC funds the collection, transport, and treatment of around half of all separately collected household WEEE each year.

REPIC's unique sector position (not for profit and producer-led) provides the perfect platform to develop strong partnerships and explore innovations that all play a part in shaping the circular economy of tomorrow.

### Benefits of working with REPIC

Proven track record of **continuous improvement** and has long established WEEE collection and treatment arrangements with the ability to deliver a quality and responsive service.

Being a not for profit company means we are driven by delivering a **compliant, cost effective** and **efficient** service. Achieving this through promoting industry best practice and continuous improvement.

REPIC seeks **open collaborative partnerships** with fully auditable and transparent treatment routes, to provide peace of mind to producers.

A one stop shop for producer responsibility requirements across the UK and Europe.
